# 42 U.S. Code § 300ff-132

---

## Routine notifications with respect to airborne infectious diseases in victims assisted

---

### **(a) Routine notification of designated officer**

#### **(1) Determination by treating facility**

If a victim of an emergency is transported by emergency response employees to a medical facility and the medical facility makes a determination that the victim has an airborne infectious disease, the medical facility shall notify the designated officer of the emergency response employees who transported the victim to the medical facility of the determination.
