
42 U.S. Code § 300g-6

Prohibition on use of lead pipes, solder, and flux

(a) In general

(1) Prohibitions

(A) In general

No person may use any pipe, any pipe or plumbing fitting or fixture, any solder, or any flux, after June 19, 1986, in the installation or repair of—

- (i) any public water system; or
- (ii) any plumbing in a residential or nonresidential facility providing water for human consumption, that is not lead free (within the meaning of subsection (d)).

(B) Leaded joints

Subparagraph (A) shall not apply to leaded joints necessary for the repair of cast iron pipes.

(2) Public notice requirements

(A) In general

Each owner or operator of a public water system shall identify and provide notice to persons that may be affected by lead contamination of their drinking water where such contamination results from either or both of the following:

- (i) The lead content in the construction materials of the public water distribution system.
- (ii) Corrosivity of the water supply sufficient to cause leaching of lead.

The notice shall be provided in such manner and form as may be reasonably required by the Administrator. Notice under this paragraph shall be provided notwithstanding the absence of a violation of any national drinking water standard.

(B) Contents of notice

Notice under this paragraph shall provide a clear and readily understandable explanation of—

- (i) the potential sources of lead in the drinking water,
- (ii) potential adverse health effects,
- (iii) reasonably available methods of mitigating known or potential lead content in drinking water,
- (iv) any steps the system is taking to mitigate lead content in drinking water, and
- (v) the necessity for seeking alternative water supplies, if any.
