

## 40 C.F.R. § 52.151

---

### Operating permits.

---

Insofar as the permitting threshold provisions in the Pinal County Code of Regulations for the Pinal County Air Quality Control District concern the treatment of sources of greenhouse gas emissions as major sources for purposes of title V operating permits, EPA approves such provisions only to the extent they require permits for such sources where the source emits or has the potential to emit at least 100,000 tpy CO<sub>2</sub> equivalent emissions, as well as 100 tpy on a mass basis, as of July 1, 2011.
