

## 40 C.F.R. § 60.531

---

### What definitions must I know?

---

As used in this subpart, all terms not defined herein have the meaning given them in the Clean Air Act and subpart A of this part.

*Adjustable burn rate wood heater* means a wood heater that is equipped with or installed with a damper or other mechanism to allow the operator to vary burn rate conditions, regardless of whether it is internal or external to the appliance. This definition does not distinguish between heaters that are free standing, built-in or fireplace inserts.

*Approved test laboratory* means a test laboratory that is approved for wood heater certification testing under § 60.535 or is an independent third-party test laboratory that is accredited under ISO–IEC Standard 17025 to perform testing using the test methods specified in § 60.534 by an accreditation body that is a full member signatory to the International Laboratory Accreditation Cooperation Mutual Recognition Arrangement and approved by the EPA for conducting testing under this subpart.

*Camp stove* (sometimes also called cylinder stove or wall tent stove) means a portable stove equipped with a pipe or chimney exhaust capable of burning wood or coal intended for use in a tent or other temporary structure used for hunting, camping, fishing or other outdoor recreation. The primary purpose of the stove is to provide space heating, although cooking and heating water may be additional functions.

*Catalytic combustor* means a device coated with a noble metal used in a wood heater to lower the temperature required for combustion.

*Chip wood fuel* means wood chipped into small pieces that are uniform in size, shape, moisture, density and energy content.

*Coal-only heater* means an enclosed, coal-burning appliance capable of space heating or space heating and domestic water heating, which is marketed and warranted solely as a coal-only heater and has all of the following characteristics:

- (1) An opening for emptying ash that is located near the bottom or the side of the appliance;
  - (2) A system that admits air primarily up and through the fuel bed;
  - (3) A grate or other similar device for shaking or disturbing the fuel bed or a power-driven or mechanical stoker;
  - (4) Installation instructions, owner's manual and marketing information that state that the use of wood in the stove, except for coal ignition purposes, is prohibited by law; and
  - (5) A safety listing as a coal-only heater, except for coal ignition purposes, under accepted American or Canadian safety codes, as documented by a permanent label from a nationally recognized certification
-

body.
