
40 C.F.R. § 61.135

Standard: Equipment leaks.

- (a) Each owner or operator of equipment in benzene service shall comply with the requirements of 40 CFR part 61, subpart V, except as provided in this section.
 - (b) The provisions of § 61.242-3 and § 61.242-9 of subpart V do not apply to this subpart.
 - (c) Each piece of equipment in benzene service to which this subpart applies shall be marked in such a manner that it can be distinguished readily from other pieces of equipment in benzene service.
 - (d) Each exhauster shall be monitored quarterly to detect leaks by the methods specified in § 61.245(b) except as provided in § 61.136(d) and paragraphs (e)-(g) of this section.
- (1) If an instrument reading of 10,000 ppm or greater is measured, a leak is detected.
- (2) When a leak is detected, it shall be repaired as soon as practicable, but no later than 15 calendar days after it is detected, except as provided in § 61.242-10 (a) and (b). A first attempt at repair shall be made no later than 5 calendar days after each leak is detected.
