## 40 C.F.R. § 1037.705

---

### Generating and calculating emission credits.

---

- (a) The provisions of this section apply separately for calculating emission credits for each pollutant.
- (b) For each participating family or subfamily, calculate positive or negative emission credits relative to the otherwise applicable emission standard. Calculate positive emission credits for a family or subfamily that has an FEL below the standard. Calculate negative emission credits for a family or subfamily that has an FEL above the standard. Sum your positive and negative credits for the model year before rounding. Round the sum of emission credits to the nearest megagram (Mg), using consistent units with the following equation:
