
40 C.F.R. § 1039.135

How must I label and identify the engines I produce?

- (a) Assign each engine a unique identification number and permanently affix, engrave, or stamp it on the engine in a legible way.
- (b) At the time of manufacture, affix a permanent and legible label identifying each engine. The label must meet the requirements of 40 CFR 1068.45.
- (c) The label must—
 - (1) Include the heading “EMISSION CONTROL INFORMATION”.
 - (2) Include your full corporate name and trademark. You may identify another company and use its trademark instead of yours if you comply with the branding provisions of 40 CFR 1068.45.
 - (3) Include EPA's standardized designation for the engine family (and subfamily, where applicable).
 - (4) State the power category or subcategory from § 1039.101 or § 1039.102 that determines the applicable emission standards for the engine family. For engines at or above 37 kW and below 56 kW from model years 2008 through 2012, and for engines less than 8 kW utilizing the provision at § 1039.101(c), you must state the applicable PM standard for the engine family.
 - (5) State the engine's displacement (in liters); however, you may omit this from the label if all the engines in the engine family have the same per-cylinder displacement and total displacement.
