
40 C.F.R. § 1042.135

Labeling.

- (a) Assign each engine a unique identification number and permanently affix, engrave, or stamp it on the engine in a legible way.
- (b) At the time of manufacture, affix a permanent and legible label identifying each engine. The label must meet the requirements of 40 CFR 1068.45.
- (c) The label must—
 - (1) Include the heading “EMISSION CONTROL INFORMATION”.
 - (2) Include your full corporate name and trademark. You may identify another company and use its trademark instead of yours if you comply with the branding provisions of 40 CFR 1068.45.
 - (3) Include EPA's standardized designation for the engine family (and subfamily, where applicable).
 - (4) Identify all the emission standards that apply to the engine (or FELs, if applicable). If you do not declare an FEL under subpart H of this part, you may alternatively state the engine's category, displacement (in liters or L/cyl), maximum engine power (in kW), and power density (in kW/L) as needed to determine the emission standards for the engine family. You may specify displacement, maximum engine power, or power density as a range consistent with the ranges listed in § 1042.101. See § 1042.140 for descriptions of how to specify per-cylinder displacement, maximum engine power, and power density.
