## 40 C.F.R. § 1051.230

---

### How do I select engine families?

---

- (a) For purposes of certification, divide your product line into families of vehicles as described in this section. Except as specified in paragraph (f) of this section, you must have separate engine families for meeting exhaust and evaporative emissions. Your engine family is limited to a single model year.
- (b) For exhaust emissions, group vehicles in the same engine family if they are the same in all the following aspects:
- (1) The combustion cycle.
  - (2) The cooling system (liquid-cooled vs. air-cooled).
  - (3) Configuration of the fuel system (for example, port fuel injection vs. carburetion).
  - (4) Method of air aspiration.
  - (5) The number, location, volume, and composition of catalytic converters.
