

40 C.F.R. § 1051.320

What happens if one of my production-line vehicles or engines fails to meet emission standards?

- (a) If you have a production-line vehicle or engine with final deteriorated test results exceeding one or more emission standards (see § 1051.315(a)), the certificate of conformity is automatically suspended for that failing vehicle or engine. You must take the following actions before your certificate of conformity can cover that vehicle or engine:
