## 40 C.F.R. § 1054.135

---

### How must I label and identify the engines I produce?

---

The provisions of this section apply to engine manufacturers.

- (a) Assign each engine a unique identification number and permanently affix, engrave, or stamp it on the engine in a legible way.
- (b) At the time of manufacture, affix a permanent and legible label identifying each engine. The label must be —
  - (1) Attached in one piece so it is not removable without being destroyed or defaced.
  - (2) Secured to a part of the engine needed for normal operation and not normally requiring replacement.
  - (3) Durable and readable for the engine's entire life.
  - (4) Written in English.
- (c) The label must conform to the following specifications without exception:
  - (1) Include the heading “EMISSION CONTROL INFORMATION”.
  - (2) Include your full corporate name and trademark. You may identify another company and use its trademark instead of yours if you comply with the branding provisions of 40 CFR 1068.45.
  - (3) Include EPA's standardized designation for the emission family (and subfamily, where applicable).
  - (4) State the following based on the useful life requirements in § 1054.107: “EMISSION COMPLIANCE PERIOD = [identify applicable useful life period] HOURS”. In addition to specifying the hours, you may optionally add the descriptive terms specified in § 1054.107(a) to characterize the useful life. You may use the term Heavy Commercial for nonhandheld engines if you establish a longer useful life under § 1054.107(a)(2).
