

40 C.F.R. § 1054.240

How do I demonstrate that my emission family complies with exhaust emission standards?

- (a) For purposes of certification, your emission family is considered in compliance with the emission standards in § 1054.101(a) if all emission-data engines representing that family have test results showing official emission results and deteriorated emission levels at or below these standards. This paragraph (a) also applies for all test points for emission-data engines within the family used to establish deterioration factors. Note that your FELs are considered to be the applicable emission standards with which you must comply if you participate in the ABT program in subpart H of this part.
- (b) Your engine family is deemed not to comply if any emission-data engine representing that family has test results showing an official emission result or a deteriorated emission level for any pollutant that is above an applicable emission standard in subpart B of this part. This paragraph (b) also applies for all test points for emission-data engines within the family used to establish deterioration factors.
