

40 C.F.R. § 1065.925

PEMS preparation for field testing.

Take the following steps to prepare PEMS for field testing:

- (a) Verify that ambient conditions at the start of the test are within the limits specified in the standard-setting part. Continue to monitor these values to determine if ambient conditions exceed the limits during the test.
- (b) Install a PEMS and any accessories needed to conduct a field test.
- (c) Power the PEMS and allow pressures, temperatures, and flows to stabilize to their operating set points.
- (d) Bypass or purge any gaseous sampling PEMS instruments with ambient air until sampling begins to prevent system contamination from excessive cold-start emissions.
