

## 40 C.F.R. § 180.499

---

### Propamocarb; tolerances for residues.

---

(a) *General.* Tolerances are established for the residues of propamocarb, including its metabolites and degradates, in or on the commodities specified in table 1 to this paragraph (a) resulting from the application of the hydrochloride salt of propamocarb. Compliance with the tolerance levels in table 1 to this paragraph (a) is to be determined by measuring only propamocarb (propyl N-[3-(dimethylamino)propyl]carbamate):
