

## 40 C.F.R. § 180.522

---

### Fumigants for processed grains used in production of fermented malt beverage; tolerances for residues.

---

(a) *General.* Fumigants for processed grain may be safely used, in accordance with the following conditions.

- (1) *Methyl bromide.* Total residues of inorganic bromides (calculated as Br) from the use of this fumigant shall not exceed 125 parts per million.
- (2) Methyl bromide is used to fumigate corn grits and cracked rice in the production of fermented malt beverage.
