

## 40 C.F.R. § 463.13

---

**Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.**

---

- (a) The BAT effluent limitations guidelines for bis(2-ethylhexyl) phthalate are reserved.
- (b) The Agency has determined that, with the exception of bis(2-ethylhexyl) phthalate, there are no toxic pollutants in treatable concentrations in contact cooling and heating water. Accordingly, the Agency is promulgating BAT effluent limitations guidelines equal to the BPT effluent limitations guidelines.
