## 40 C.F.R. § 711.15

---

### Reporting information to EPA.

---

Any person who must report under this part, as described in § 711.8, must submit the information described in this section for each chemical substance described in § 711.5 that the person manufactured (including imported) for commercial purposes in an amount of 25,000 lb (11,340 kg) or more (or in an amount of 2,500 lb (1,134 kg) or more for chemical substances subject to the rules, orders, or actions described in § 711.8(b)) at any one site during any calendar year since the last principal reporting year (*e.g.*, for the 2020 submission period, consider calendar years 2016, 2017, 2018, and 2019, because 2015 was the last principal reporting year). The principal reporting year for each submission period is the previous calendar year (*e.g.*, the principal reporting year for the 2020 submission period is calendar year 2019). For all submission periods, a separate report must be submitted for each chemical substance at each site for which the submitter is required to report. A submitter of information under this part must report information as described in this section to the extent that such information is known to or reasonably ascertainable by that person.

(a) *Reporting information to EPA.* Any person who reports information to EPA must complete a Form U using the e-CDRweb reporting tool provided by EPA at the address set forth in § 711.35. The submission must include all information described in paragraph (b) of this section. Persons must submit the chemical reports on a separate single Form U for each site for which the person is required to report. The e-CDRweb reporting tool is described in the instructions available from EPA at the website set forth in § 711.35.

(b) *Information to be reported.* The information described in paragraphs (b)(1) through (4) of this section must be reported for each chemical substance manufactured (including imported) in an amount of 25,000 lb (11,340 kg) or more (or in an amount of 2,500 lb (1,134 kg) or more for chemical substances subject to the rules, orders, or actions described in § 711.8(b)) at any one site during any calendar year since the last principal reporting year. The requirement to report information described in paragraph (b)(4) of this section is subject to exemption as described in § 711.6.

(1) *A certification statement signed and dated by an authorized official of the submitter company.* The authorized official must certify that the submitted information has been completed in compliance with the requirements of this part and that the confidentiality claims made on the Form U are true and correct. The certification must be signed and dated by the authorized official for the submitter company, and provide that person's name, official title, and email address.

(2) *Company and site information.* The following currently correct parent company and site information at the date of CDR submission must be reported for each site at which a reportable chemical substance is manufactured (including imported) above the applicable production volume threshold, as described in this section (see § 711.3 for the “site” for importers and special situations).

(i) The legal name, address, and Dun and Bradstreet D-U-N-S<sup>®</sup> (D&B) number for the highest-level parent company located in the United States and, if one exists, for the highest-level foreign-based parent company. A submitter under this part must obtain a D&B number for the parent company if none exists and must report

---

using the standardized conventions for the naming of a parent company as provided in the CDR Instructions for Reporting identified in § 711.35.

(ii) The name of a person who will serve as technical contact for the submitter company who will be able to answer questions about the information submitted by the company to EPA, and that technical contact person's full mailing address, telephone number, and email address.

(iii) The legal name and full street address of each site. A submitter under this part must include the appropriate D&B number for each site reported, and the county or parish (or other jurisdictional indicator) in which the site is located. A submitter under this part must obtain a D&B number for the site reported if none exists. For a co-manufacturing situation in which the contracting company initiates the report, the contracting company must report both the site controlling the contract and the producing company's site information.

(iv) The six-digit NAICS code for the site. A submitter under this part must include the appropriate six-digit NAICS code for each site reported.

(3) *Chemical-specific information.* The following chemical-specific information must be reported for each reportable chemical substance manufactured (including imported) above the applicable production volume threshold, as described in paragraph (b) of this section:

(i) The specific, currently correct CA Index name as used to list the chemical substance on the TSCA Inventory and the correct corresponding CASRN for each reportable chemical substance at each site. Submitters who wish to report chemical substances listed on the confidential portion of the TSCA Inventory will need to report the chemical substance using the corresponding TSCA Accession Number that is listed on the public portion of the Inventory. In addition to reporting the chemical identifying number itself, submitters must specify the type of number they are reporting by selecting from among the codes in Table 1 to paragraph (b)(3)(i).

Table 1 to Paragraph (b)(3)(i)—Codes To Specify Type of Chemical Identifying Number

Code	Number type
A	TSCA Accession Number.
C	Chemical Abstracts Service Registry Number (CASRN).

(A) If an importer submitting a report cannot provide the information specified in this paragraph (b)(3)(i) because it is unknown to the importer and claimed as confidential by the supplier of the chemical substance or mixture, the importer must use e-CDRweb to ask the supplier to provide the correct chemical identity and, in the case of a mixture, the percentage of formulation and chemical function information directly to EPA in a joint submission. Such request must include instructions for submitting chemical identity information electronically, using e-CDRweb and CDX (see § 711.35), and for clearly referencing the importer's submission. Contact information for the supplier, a trade name or other designation for the chemical substance or mixture, and a copy of the request to the supplier must be included with the importer's submission.

(B) If a manufacturer submitting a report cannot provide the information specified in this paragraph (b)(3)(i) because the reportable chemical substance is manufactured using a reactant having a specific chemical identity that is unknown to the manufacturer and claimed as confidential by its supplier, the manufacturer must use e-CDRweb to ask the supplier of the confidential reactant to provide the correct chemical identity of the confidential reactant directly to EPA in a joint submission. Such request must include instructions for

submitting chemical identity information electronically using e-CDRweb and CDX (see § 711.35), and for clearly referencing the manufacturer's submission. Contact information for the supplier, a trade name or other designation for the chemical substance, and a copy of the request to the supplier must be included with the importer's submission.

(C) EPA will accept only joint submissions that are submitted electronically using e-CDRweb and CDX (see § 711.35) and that clearly reference the primary submission to which they refer.

(ii) For the principal reporting year only, a statement indicating, for each reportable chemical substance at each site, whether the chemical substance is manufactured in the United States, imported into the United States, or both manufactured in the United States and imported into the United States.
