
40 C.F.R. § 770.21

Quality control manual, facilities, and personnel.

(a) *Quality control manual.* (1) Each panel producer must have a written quality control manual. The manual must contain, at a minimum, the following:

- (i) A description of the organizational structure of the quality control department, including the names of the quality control manager and quality control employees;
- (ii) A description of the sampling procedures to be followed;
- (iii) A description of the method of handling samples, including a specific maximum time period for analyzing quality control samples;
- (iv) A description of the frequency of quality control testing;
- (v) A description of the procedures used to identify changes in formaldehyde emissions resulting from production changes (e.g., increase in the percentage of resin, increase in formaldehyde/urea molar ratio in the resin, or decrease in press time);
