

40 C.F.R. § 310.9

If more than one local agency or government is involved, can each receive up to \$25,000?

No. The maximum amount EPA can reimburse is \$25,000 for a single response, which includes all activities by ALL local responders. If the costs incurred by multiple local governments or agencies exceed \$25,000, you must decide among yourselves how the total reimbursement will be divided.
