

40 C.F.R. § 240.203-2

Recommended procedures: Design.

- (a) The types, amounts (by weight and volume), and characteristics of all solid wastes expected to be processed should be determined by survey and analysis. The gross calorific value of the solid wastes to be processed should be determined to serve as a basis for design.
- (b) Resource recovery in the form of heat utilization or direct recovery of materials should be considered in the design.
- (c) The facility should be designed to be compatible with the surrounding area, easy to maintain, and consistent with the land use of the area.
- (d) Employee convenience facilities and plant maintenance facilities should be provided. Adequate lighting should be provided throughout the facility.
