

40 C.F.R. § 261.1082

Standards: General.

- (a) This section applies to the management of hazardous secondary material in tanks and containers subject to this subpart.
- (b) The remanufacturer or other person that stores or treats the hazardous secondary material shall control air pollutant emissions from each hazardous secondary material management unit in accordance with standards specified in §§ 261.1084 through 261.1087 of this subpart, as applicable to the hazardous secondary material management unit, except as provided for in paragraph (c) of this section.
