

40 C.F.R. § 265.226

Monitoring and inspection.

(a) The owner or operator must inspect:

- (1) The freeboard level at least once each operating day to ensure compliance with § 265.222, and
- (2) The surface impoundment, including dikes and vegetation surrounding the dike, at least once a week to detect any leaks, deterioration, or failures in the impoundment.

(b)

- (1) An owner or operator required to have a leak detection system under § 265.221(a) must record the amount of liquids removed from each leak detection system sump at least once each week during the active life and closure period.
