

## 40 C.F.R. § 265.253

---

### Containment.

---

If leachate or run-off from a pile is a hazardous waste, then either:

(a)

(1) The pile must be placed on an impermeable base that is compatible with the waste under the conditions of treatment or storage;

(2) The owner or operator must design, construct, operate, and maintain a run-on control system capable of preventing flow onto the active portion of the pile during peak discharge from at least a 25-year storm;
