

## 40 C.F.R. § 63.11499

---

### What are the standards and compliance requirements for heat exchange systems?

---

- (a) If the cooling water flow rate in your heat exchange system is equal to or greater than 8,000 gal/min and is not meeting one or more of the conditions in § 63.104(a), then you must comply with one of the requirements specified in Table 8 to this subpart.
