
40 C.F.R. § 63.11584

What are my initial and continuous compliance management practice requirements?

(a) For each new and existing affected source, you must demonstrate initial compliance by conducting the inspection activities in paragraph (a)(1) of this section and demonstrate ongoing compliance by conducting the inspection activities in paragraph (a)(2) of this section.

(1) Initial vent collection system and particulate control device inspections. You must conduct an initial inspection of each vent collection system and particulate control device according to the requirements in paragraphs (a)(1)(i) through (iv) of this section. You must record the results of each inspection according to paragraph (b) of this section and perform corrective action where necessary. You must conduct each inspection no later than 180 days after your applicable compliance date for each control device which has been operated within 180 days following the compliance date. For a control device which has not been installed or operated within 180 days following the compliance date, you must conduct an initial inspection prior to startup of the control device.

(i) For each wet particulate control system, you must verify the presence of water flow to the control equipment. You must also visually inspect the vent collection system ductwork and control equipment for leaks (as defined in § 63.11588, “What definitions apply to this subpart?”) and inspect the interior of the control equipment (if applicable) for structural integrity and the condition of the control system.
