

40 C.F.R. § 85.530

Vehicle/engine labels and packaging labels.

(a) The following labeling requirements apply for clean alternative fuel conversion manufacturers to qualify for an exemption from the tampering prohibition:

(1) You must make a supplemental emission control information label for each clean alternative fuel conversion system.

(2) On the supplemental label you must identify the OEM vehicles/engines for which you authorize the use of your clean alternative fuel conversion system, consistent with the requirements of this subpart. You may do this by identifying the OEM test group/engine family names and original model year to which your conversion is applicable as described in § 85.510(b)(1) or § 85.510(b)(2), § 85.515(b)(10)(ii), or § 85.520(b)(6)(ii). Your commercial packaging materials must also clearly describe this information.
