

40 C.F.R. § 86.1908

How must I select and screen my in-use engines?

(a) Once we direct you to do testing under this subpart, you must make arrangements to select test vehicles and engines that meet the following criteria:

- (1) The engines must be representative of the engine family.
- (2) The usage of the vehicles must be representative of typical usage for the vehicles' particular application.
- (3) The vehicles come from at least two independent sources.
- (4) The key vehicle/engine systems (e.g., power train, drive train, emission control) have been properly maintained and used.
