

## 40 C.F.R. § 86.432-78

---

### Deterioration factor.

---

(a) Deterioration factors shall be developed for each test vehicle from the emission test results. A separate factor shall be developed for each pollutant. The applicable data to be used in calculating these factors are:

- (1) The results from all valid tests conducted by the manufacturer or Administrator at scheduled test intervals.
- (2) The results from tests conducted before and after scheduled maintenance unless specifically excluded by the Administrator.
- (3) The results from tests conducted before and after unscheduled maintenance, if approval of the maintenance by the Administrator was conditioned on the data being used in the deterioration factor calculation.
