

## 40 C.F.R. § 98.242

---

### GHGs to report.

---

You must report the information in paragraphs (a) through (c) of this section:

(a) CO<sub>2</sub>, CH<sub>4</sub>, and N<sub>2</sub>O process emissions from each petrochemical process unit. Process emissions include CO<sub>2</sub> generated by reaction in the process and by combustion of process off-gas in stationary combustion units and flares.

(1) If you comply with § 98.243(b) or (d), report under this subpart the calculated CO<sub>2</sub>, CH<sub>4</sub>, and N<sub>2</sub>O emissions for each stationary combustion source and flare that burns any amount of petrochemical process off-gas. If you comply with § 98.243(b), also report under this subpart the measured CO<sub>2</sub> emissions from process vents routed to stacks that are not associated with stationary combustion units.
