

## 40 C.F.R. § 98.283

---

### Calculating GHG emissions.

---

You must calculate and report the combined annual process CO<sub>2</sub> emissions from all silicon carbide process units and production furnaces using the procedures in either paragraph (a) or (b) of this section.

- (a) Calculate and report under this subpart the combined annual process CO<sub>2</sub> emissions by operating and maintaining CEMS according to the Tier 4 Calculation Methodology specified in § 98.33(a)(4) and all associated requirements for Tier 4 in subpart C of this part (General Stationary Fuel Combustion Sources).
- (b) Calculate and report under this subpart the combined annual process CO<sub>2</sub> emissions using the procedures in paragraphs (b)(1) and (b)(2) of this section.
