

## 40 C.F.R. § 62.15015

---

### Can my small municipal waste combustion unit be covered by both a State plan and this subpart?

---

- (a) If your municipal waste combustion unit is located in a State that has a State plan that has not been approved by the EPA or has not become effective, then this subpart applies and the State plan would not apply to your municipal waste combustion unit. However, the State could enforce the requirements of a State regulation while your municipal waste combustion unit is still subject to this subpart.
