

## 40 C.F.R. § 63.1158

---

### Emission standards for new or reconstructed sources.

---

- (a) *Pickling lines*—(1) *Continuous pickling lines*. No owner or operator of a new or reconstructed affected continuous pickling line at a steel pickling facility shall cause or allow to be discharged into the atmosphere from the affected pickling line:
- (i) Any gases that contain HCl in a concentration in excess of 6 ppmv; or
