

## 40 C.F.R. § 63.1178

---

### For cupolas, what standards must I meet?

---

- (a) You must control emissions from each cupola as specified in Table 2 to this subpart.
- (b) You must meet the following operating limits for each cupola:
  - (1) Begin within one hour after the alarm on a bag leak detection system sounds, and complete in a timely manner, corrective actions as specified in your operations, maintenance, and monitoring plan required by § 63.1187 of this subpart.
