

40 C.F.R. § 63.1181

How do I comply with the particulate matter standards for existing, new, and reconstructed cupolas?

To comply with the PM standards, you must meet all of the following:

- (a) Install, adjust, maintain, and continuously operate a bag leak detection system for each fabric filter.
- (b) Do a performance test as specified in § 63.1188 of this subpart and show compliance with the PM emission limits while the bag leak detection system is installed, operational, and properly adjusted.
