

## 40 C.F.R. § 63.1303

---

### Monitoring requirements.

---

Owners and operators of affected sources shall comply with each applicable monitoring provision in this section.

- (a) *Monitoring requirements for storage vessel carbon adsorption systems.* Each owner or operator using a carbon adsorption system to meet the requirements of § 63.1294(a) shall monitor the concentration level of the HAP or the organic compounds in the exhaust vent stream (or outlet stream exhaust) from the carbon adsorption system at the frequency specified in paragraph (a)(1) or (2) of this section.
