
40 C.F.R. § 63.7300

What are my operation and maintenance requirements?

- (a) As required by § 63.6(e)(1)(i), you must always operate and maintain your affected source, including air pollution control and monitoring equipment, in a manner consistent with good air pollution control practices for minimizing emissions at least to the levels required by this subpart.
- (b) You must prepare and operate at all times according to a written operation and maintenance plan for the general operation and maintenance of new or existing by-product coke oven batteries. Each plan must address, at a minimum, the elements listed in paragraphs (b)(1) through (6) of this section.
- (1) Frequency and method of recording underfiring gas parameters.
- (2) Frequency and method of recording battery operating temperature, including measurement of individual flue and cross-wall temperatures.
- (3) Procedures to prevent pushing an oven before it is fully coked.
- (4) Procedures to prevent overcharging and undercharging of ovens, including measurement of coal moisture, coal bulk density, and procedures for determining volume of coal charged.
