

40 C.F.R. § 63.855

Alternative emissions limits for co-controlled new and existing anode bake furnaces.

(a) *Applicability.* The owner or operator of a new anode bake furnace meeting the criteria of paragraphs (a)(1) and (2) of this section may demonstrate compliance with alternative TF and POM emission limits according to the procedures of this section.

- (1) The new anode bake furnace must have been permitted to operate prior to May 1, 1998; and
- (2) The new anode bake furnace must share a common control device with one or more existing anode bake furnaces.
