Report on Supply Chain Compliance Volume 2, Number 8. May 02, 2019

The threat of supply chain hackers

By Sascha Matuszak

A recent spate of breaches point to a new method for inserting malware into the supply chain and seizing control of computer networks: hacking the software supply chain. In an article for *Wired*, Andy Greenberg describes how security firms Kaspersky and ESET uncovered evidence of hacks into the companies that distribute developer code used by the hackers' targets.
