

29 C.F.R. § 471.16

Under what circumstances may a contractor be reinstated?

Any contractor or subcontractor debarred from or declared ineligible for further contracts under the Executive Order and this part may request reinstatement in a letter to the Director of OLMS. In connection with a request for reinstatement, debarred contractors and subcontractors shall be required to show that they have established and will carry out policies and practices in compliance with the Executive Order and implementing regulations. Before reaching a decision, the Director of OLMS may request that a compliance evaluation of the contractor or subcontractor be conducted, and may require the contractor or subcontractor to supply additional information regarding the request for reinstatement. If the Director of OLMS finds that the contractor or subcontractor has come into compliance with the Executive Order and this part and has shown that it will carry out the Executive Order and this part, the contractor or subcontractor may be reinstated. The Director of OLMS shall issue a written decision on the request.
