## 29 C.F.R. § 778.111

---

### Piecoworker.

---

(a) *Piece rates and supplements generally.* When an employee is employed on a piece-rate basis, the regular hourly rate of pay is computed by adding together total earnings for the workweek from piece rates and all other sources (such as production bonuses) and any sums paid for waiting time or other hours worked (except statutory exclusions). This sum is then divided by the number of hours worked in the week for which such compensation was paid, to yield the piecoworker's "regular rate" for that week. For overtime work the piecoworker is entitled to be paid, in addition to the total weekly earnings at this regular rate for all hours worked, a sum equivalent to one-half this regular rate of pay multiplied by the number of hours worked in excess of 40 in the week. (For an alternative method of complying with the overtime requirements of the Act as far as piecoworkers are concerned, *see* § 778.418.) Only additional half-time pay is required in such cases where the employee has already received straight-time compensation at piece rates or by supplementary payments for all hours worked. Thus, for example, if the employee has worked 50 hours and has earned \$491 at piece rates for 46 hours of productive work and in addition has been compensated at \$8.00 an hour for 4 hours of waiting time, the total compensation, \$523.00, must be divided by the total hours of work, 50, to arrive at the regular hourly rate of pay—\$10.46. For the 10 hours of overtime the employee is entitled to additional compensation of \$52.30 (10 hours at \$5.23). For the week's work the employee is thus entitled to a total of \$575.30 (which is equivalent to 40 hours at \$10.46 plus 10 overtime hours at \$15.69).
