

29 C.F.R. § 1926.105

Safety nets.

- (a) Safety nets shall be provided when workplaces are more than 25 feet above the ground or water surface, or other surfaces where the use of ladders, scaffolds, catch platforms, temporary floors, safety lines, or safety belts is impractical.
- (b) Where safety net protection is required by this part, operations shall not be undertaken until the net is in place and has been tested.
