
29 C.F.R. § 1926.305

Jacks—lever and ratchet, screw, and hydraulic.

- (a) *General requirements.* (1) The manufacturer's rated capacity shall be legibly marked on all jacks and shall not be exceeded.
- (2) All jacks shall have a positive stop to prevent overtravel.
- (b) [Reserved]
- (c) *Blocking.* When it is necessary to provide a firm foundation, the base of the jack shall be blocked or cribbed. Where there is a possibility of slippage of the metal cap of the jack, a wood block shall be placed between the cap and the load.
