## 29 C.F.R. § 4211.13

---

### Modifications to the direct attribution method.

---

(a) *Error in direct attribution method.* The unfunded vested benefits allocated to a withdrawing employer under the direct attribution method are the sum of the employer's attributable liability, determined under section 4211(c)(4)(A)(i) and (B) of ERISA, and the employer's share of the plan's unattributable liability, determined under section 4211(c)(4)(E) and allocated to the employer under section 4211(c)(4)(F). Plan sponsors should allocate unattributable liabilities on the basis of the employer's share of the attributable liabilities. However, section 4211(c)(4)(F) of ERISA, which describes the allocation of unattributable liabilities, contains a typographical error. Therefore, plans adopting the direct attribution method must modify the phrase “as the amount determined under subparagraph (C) for the employer bears to the sum of the amounts determined under subparagraph (C) for all employers under the plan” in section 4211(c)(4)(F) by substituting “subparagraph (B)” for “subparagraph (C)” in both places it appears.
