

45 C.F.R. § 411.42

Use of assessment information.

- (a) The care provider facility must use the information from the risk assessment under § 411.41 to inform assignment of UCs to housing, education, recreation, and other activities and services. The care provider facility must make individualized determinations about how to ensure the safety and health of each UC.
- (b) Care provider facilities may not place UCs on one-on-one supervision as a result of the assessment completed in § 411.41 unless there are exigent circumstances that require one-on-one supervision to keep the UC, other UCs, or staff safe, and then, only until an alternative means of keeping all residents and staff safe can be arranged. During any period of one-on-one supervision, a UC may not be denied any required services, including but not limited to daily large-muscle exercise, required educational programming, and social services, as reasonable under the circumstances. UCs on one-on-one supervision must receive daily visits from a medical practitioner or mental health care clinician as necessary unless the medical practitioner or mental health care clinician determines daily visits are not required. The medical practitioner or mental health care clinician, however, must continue to meet with the UC on a regular basis while the UC is on one-on-one supervision.
