
45 C.F.R. § 612.10

Fees

(a) *In general.* NSF will charge for processing requests under the FOIA in accordance with paragraph (c) of this section, except where fees are limited under paragraph (d) of this section or where a waiver or reduction of fees is granted under paragraph (k) of this section. If fees are applicable, NSF will itemize the amounts charged. NSF may collect all applicable fees before sending copies of requested records to a requester. Requesters must pay fees by check or money order made payable to the Treasury of the United States.

(b) *Definitions.* For purposes of this section:

(1) *Commercial use request* means a request from or on behalf of a person who seeks information for a use or purpose that furthers his or her commercial, trade, or profit interests, which can include furthering those interests through litigation. When it appears that the requester will put the records to a commercial use, either because of the nature of the request itself or because NSF has reasonable cause to doubt a requester's stated use, NSF will provide the requester a reasonable opportunity to submit further clarification.

(2) *Direct costs* means those expenses that an agency actually incurs in searching for and duplicating (and, in the case of commercial use requests, reviewing) records to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing the work (the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits) and the cost of operating duplication machinery. Not included in direct costs are overhead expenses such as the costs of space and heating or lighting of the facility in which the records are kept.

(3) *Duplication* means the making of a copy of a record, or of the information contained in it, necessary to respond to a FOIA request. Copies can take the form of paper, microform, audiovisual materials, or electronic records (for example, magnetic tape or compact disk) among others. NSF will honor a requester's specified preference of form or format of disclosure if the record is readily reproducible by NSF, with reasonable effort, in the requested form or format.

(4) *Educational institution* means a preschool, a public or private elementary or secondary school, an institution of undergraduate higher education, an institution of graduate higher education, an institution of professional education, or an institution of vocational education that operates a program of scholarly research. To be in this category, a requester must show that the request is authorized by and made under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought to further scholarly research.

(5) *Noncommercial scientific institution* means an institution that is not operated on a "commercial" basis, as that term is defined in paragraph (b)(1) of this section, and that is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry. To be in this category, a requester must show that the request is authorized by and made under the auspices of a qualifying institution and that the records are not sought for a commercial use or to promote any particular

product or industry, but are sought to further scientific research.

(6) *Representative of the news media or news media requester* means any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term *news* means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large and publishers of periodicals (but only in those instances where they can qualify as disseminators of “news”) who make their products available for purchase or subscription by the general public. For “freelance” journalists to be regarded as working for a news organization, they must demonstrate a solid basis for expecting publication through that organization. A publication contract would be the clearest proof, but NSF shall also look to the past publication record of a requester in making this determination. To be in this category, a requester must not be seeking the requested records for a commercial use. However, a request for records supporting the news dissemination function of the requester will not be considered to be for a commercial use.
