

42 C.F.R. § 410.30

Prescription drugs used in immunosuppressive therapy.

(a) *Scope.* Payment may be made for prescription drugs used in immunosuppressive therapy that have been approved for marketing by the FDA and that meet one of the following conditions:

- (1) The approved labeling includes the indication for preventing or treating the rejection of a transplanted organ or tissue.
- (2) The approved labeling includes the indication for use in conjunction with immunosuppressive drugs to prevent or treat rejection of a transplanted organ or tissue.
