
42 C.F.R. § 410.41

Requirements for ambulance providers and suppliers.

(a) *Vehicle.* A vehicle used as an ambulance must meet the following requirements:

- (1) Be specially designed to respond to medical emergencies or provide acute medical care to transport the sick and injured and comply with all State and local laws governing an emergency transportation vehicle.
- (2) Be equipped with emergency warning lights and sirens, as required by State or local laws.
- (3) Be equipped with telecommunications equipment as required by State or local law to include, at a minimum, one two-way voice radio or wireless telephone.
