

42 C.F.R. § 84.142

Air supply source; hand-operated or motor driven air blowers; Type A supplied-air respirators; minimum requirements.

- (a) Blowers shall be designed and constructed to deliver an adequate amount of air to the wearer with either direction of rotation, unless constructed to permit rotation in one direction only, and to permit the free entrance of air to the hose when the blower is not operated.
