

42 C.F.R. § 84.149

Type C supplied-air respirator, demand and pressure demand class; minimum requirements.

- (a) Respirators tested under this section shall be approved only when used to supply respirable air at the pressures and quantities required.
- (b) The manufacturer shall specify the range of air pressure at the point of attachment of the air-supply hose to the air-supply system, and the range of hose length for the respirator. For example, he might specify that the respirator be used with compressed air at pressures ranging from 280-550 kN/m. (40 to 80 pounds per square inch) with from 6 to 76 m. (15 to 250 feet) of air-supply hose.
