

42 C.F.R. § 84.21

Fee calculation.

- (a) This section explains the process NIOSH uses to calculate estimates of the direct and indirect costs of services provided in the course of application processing.
- (b) Upon completion of an initial administrative review of the application, NIOSH will calculate a fee estimate for each application, including the maximum cost of conducting additional tests under § 84.24, and will provide that estimate, with payment details, to the applicant. The fee estimate will be derived using the current schedules of fees published by NIOSH in Part 84. NIOSH will begin the technical evaluation once the applicant accepts the terms of the fee estimate and authorizes payment.
